RATUKI

(RA-TOO-KEE) ADJ. FAST

Contents:

175 cards (35 in each colored set)
and 5 reminder cards.

How To Win

Be the first player to 100 points by collecting cards.

Setup

1. Separate the cards into single color decks. Each player chooses one. Return the rest to the box.
2. Shuffle your deck and put it face-down in front of you. This is your draw deck.
3. Draw three cards from your deck.
4. Find a pen and paper (not supplied) to keep score.

The Cards

Cards are numbered 1-5, in all sorts of different styles. There are also 2 **RATUKI** cards in each deck, which are used as wild cards to grab any stack at anytime!

How to Play!

1. Someone shouts "RATUKI". Let the chaos begin!
2. If you have a 1 or a **RATUKI** card in your hand, you can start a stack by laying it on the table. Take another card from your draw deck so you always have 3 cards in your hand.
3. You can add cards from your hand to any stack if you have a card that's one number higher or lower than the top card of that pile.
4. As soon you complete a stack with a "5" or play a **RATUKI** card, shout "RATUKI", collect those cards and put them face-up on your score pile.
5. If you have trouble getting rid of a card from your hand, you can place it face-down on your junk pile and replace it with another from your draw pile. If you deplete your draw pile, use your junk pile to start a new draw deck and put those cards faceup on your score pile.

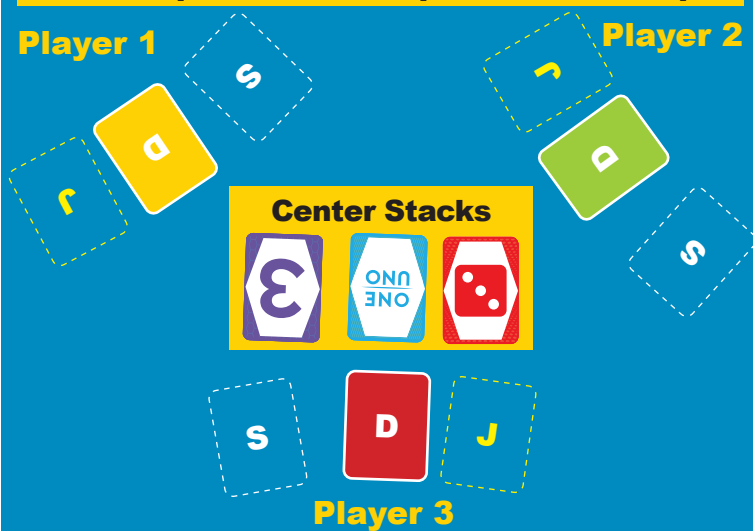

IMPORTANT: You can use only **ONE HAND** to lay cards. It doesn't matter which, but once you've picked, stick to it!

D = Draw pile J = Junk pile S = Score pile

Player 1

Player 2

Scoring and Winning

1. Count the cards in your score pile. Each card is worth one point.
2. Count the cards on your draw and junk piles, then subtract that total from the score pile. This is your score for this round. If your score is a negative number, just record "0" for this round.

Speedy Game

Play a single round. The player with the most points at the end of that round is the winner!

Remember, your aim is to be the player that plays a 5 card (or a **RATUKI** card), on the top, so you can win the stack.

Rules to Remember

- You can only start a stack with a 1 (of any design) or a **RATUKI** card.
- No More Than 3 Cards in Your Hand: A player may not have more than 3 cards in their hand at any time.
- No Playing Cards with Both Hands: Use one hand to hold cards, and one hand to play cards. You can forgive this rule for beginners.
- Play One Card at a Time: A player may only draw, discard, and play one card at a time in any pile or center stack.
- Number of CENTER STACKS in Play: The number of CENTER STACKS allowed can be no more than the number of players.
